

**ARTICLE 36
SIGN REGULATIONS**

Section 36.01 Intent

It is the intent of this article to establish reasonable regulations governing the size, character, and location of signs within Bethel Township in the interest of the public health, safety and morals of its citizens, business concerns, and other affected sections of the Township. Within this framework, these regulations are adopted to achieve the following objectives:

- A. To minimize the possibility that sign size, location, or character will create hazards adversely affecting the public safety.
- B. To establish sign limitations which allow a reasonable capability for advertisement, but which prevents the escalation of sign competition to levels, which are non-productive and create unnecessarily high entrepreneurial costs.
- C. To provide sign regulations, which are directly related to land, use and, therefore, to the functional and economic need for signs of varying sizes, types, and locations.
- D. To create a more aesthetically pleasing environment without unreasonably limiting the right of individuals to employ signs in the legitimate use of their property.

Section 36.02 Scope of Regulations

The regulations herein set forth shall apply to and govern signs in all districts:

- A. All signs shall be erected or maintained in compliance with the regulations governing size and height for the district in which it is located, unless such sign is otherwise specifically regulated by a temporary permit, or variance granted by the Board of Appeals.
- B. All signs shall be erected in conformity with the respective zoning district yard requirements unless otherwise specified. No sign shall be erected so as to prevent free ingress to or egress from any door, window on any other exit way required by the State of Ohio or Miami County Building Code, and amendments thereto, or by other adopted codes or regulations.
- C. Signs which become obsolete due to cessation of the business, activity, product, or service advertised thereon for any other reason shall be completely removed from the premises within sixty (60) days after such obsolescence is established by the Zoning Administrator, unless said sign is converted to another lawful and contemporary use within that sixty (60) day period. The supporting structure for obsolete signs must be completely removed with a sixty (60) day period after obsolescence is established unless a new and lawful sign is established thereon.

- D. Where illumination of signs is permitted, such illumination shall be neither flashing nor intermittent and shall be designed and constructed so as to concentrate the illumination upon the area of the sign and prevent glare upon the street or adjacent property. Such illumination shall be turned off no later than 11:00 p.m. or at the end of the business day, whichever is later.
- E. No sign shall be erected at the intersection of any streets in such a manner as to obstruct free and clear vision, at any location where, by reasons of the position, shape or color, it may interfere with, obstruct the view of, or be confused with any authorized traffic sign, signal, or device, or which makes use of the words "stop", "look", "drive-in", "danger", or any other words, phrase, symbol, or character in such a manner as to interfere with, mislead, or confuse traffic.
- F. It shall be unlawful for any person to display upon any sign or other advertising structure any obscene, indecent, or immoral matter.
- G. Any sign is limited in subject matter to the name, design, picture, or trademark of the owner, operator, builder, sales agent, managing agent, lessor, or lessee of the premises or of the activities (including merchandise handles or services rendered) on the premises on which such sign is located and does not include any general commercial advertising unrelated to or extending in substantial degree beyond the enumerated permitted subjects.
- H. Signs either free standing or wall shall be designed as to be similar in character with regard to materials, color, and size to conforming signs designed or located on the same lot and on adjoining lots in order to equalize the attention they are meant to attract and to produce an overall unified effect, all in accordance with the other requirements of this Article.
- I. All signs must be maintained in good repair and appearance by the owner at all times.

Section 36.03 Measurement Standards

The following standards shall be used to determine the area and height measurements for all signs in the Township:

- A. The area of a sign shall be computed by means of the smallest square, circle, rectangle, triangle, or combination thereof that will encompass the exterior display limits of a sign, but not including any supporting frame or bracing.
- B. The sign area for a sign with more than one face shall be computed by adding together the area of all sign faces visible from any one point.
- C. In the case of irregularly shaped three dimensional signs the area of the display surface shall be measured on the plane of the largest vertical cross Section.
- D. The height of a sign shall be determined by measuring the vertical distance between the top part of the sign to the elevation of the ground beneath the sign prior to construction, excluding additional elevation

added by creation of berming or mounding. If the grade prior to construction can not be determined, the elevation of the base of the sign shall be computed using the elevation of the nearest point of the crown of a public street or the grade of the land at the principal entrance to the principal structure on the premises, whichever is lower.

Section 36.04 Prohibited Signs

The following types of signs are prohibited in Bethel Township:

- A. All blinding, flashing, or intermittent lighting is prohibited unless by approval of a Conditional Use Permit by the Board of Appeals.
- B. Pennants, banners, streamers, searchlights, spinning and similar type devices are prohibited except when allowed as a temporary sign.

Further, no new signs associated with nonconforming land uses may be erected, except replacements, which are the same, or smaller in size than the sign being replaced. In the event that a sign associated with a nonconforming land use is moved, its new location must conform to the setback requirements of the district in which it is located, as if it were a building.

If any such sign has not been removed on or before the expiration of ten (10) days following the receipt of said notice by the owner or lessee of the land upon which the sign is located, the Zoning Administrator or any of his duly authorized agents may enter upon the premises and remove, obliterate or abate the sign. The cost of such removal, obliteration, or abatement shall be then certified to the County Prosecutor for collection by civil action against the owner and/or lessee of the land upon which the sign is located.

Notice to the owner or lessee shall not be required prior to the removal of an unlawful sign which, in the opinion of the Zoning Administrator, creates an immediate or potential danger to persons or property due to structural deficiencies or inadequate maintenance, nor shall notice be required prior to the removal of a sign which, in the opinion of the County Engineer, creates an immediate or potential danger to persons or property because of its location.
